Full-stack web developer with four+ years experience building ASP.NET web apps. Reliable. Conscientious. Detail-oriented.

SKILLS

Web Development

- ASP.NET Core and MVC 5
- C# (proficient)
- JavaScript
- HTML5/CSS3
- jQuery (incl. AJAX)
- Bootstrap

Azure Cloud Services

- Azure Functions (C#)
- Azure Webjobs (C#)
- Building dev ops deployment pipelines in Azure
- Azure administration

Other Proficiencies

- Microsoft Dynamics 365 (CRM)
- Microsoft PowerApps
- Sitefinity CMS
- Visual Studio
- SQL Server 2012 & 2016, Azure SQL, SSMS

PROFESSIONAL EXPERIENCE

Biamp Systems – Enterprise Applications Developer (March 2016 - present)

- Designed and built C# and web extensions for Microsoft Dynamics 365 Customer Experience (CRM)
- Developed custom widgets for the customer-facing Sitefinity website using the ASP.NET web stack
- Wrote ASP.NET Core web apps to sync data between systems, manage HTML redirects, and catalogue integrations
- Developed PowerApps with complex functionality, integrating with Azure SQL tables and with SharePoint lists
- Wrote multiple Azure Functions; created an Azure Webjob to integrate third-party data with Dynamics 365
- Worked on a Scrum team, performed code reviews, trained and coached a junior developer

NuMedics, Inc. – Web Developer (November 2014 - March 2016)

- Rebuilt the company's public-facing websites using ASP.NET MVC5 framework; front- and back-end work
- Custom HTML canvases and Google Charts to display patient data, AJAX-updating at user request

Bonzi Sports Software – Web Development Intern (May 2014 - August 2014)

- Front- and back-end web development using ColdFusion, JavaScript (w/ jQuery) and T-SQL

PERSONAL PROJECTS

Portfolio Site www.billlockett.com

- ASP.NET Core 1.1 web app hosted in Azure, with Azure SQL storage, individual user accounts
- Portal for user with "Admin" role (i.e., just me) to manage user logins and roles
- My web development showcase including hobby projects of varying complexity
- Role-restricted access to license plates-tracking app, storing user input in Azure SQL, reflecting data on a U.S. map in sync with checkboxes
- Simpler front-end projects include interactive electoral vote map, functional cribbage board, pong doppelganger

Blog www.billlockett.com/blog

- ASP.NET Core web app, Azure SQL storage
- Blog entries can be associated with zero or more categories, appearing on that category's page
- Portal for "Admin" user to perform CRUD operations on blog entries, add/remove from categories

EDUCATION

- Bachelor of Science, Computer Science, Oregon State University, 2013
- Bachelor of Science, Journalism, University of Wyoming

ADDITIONAL EXPERIENCE
